**EVOD GLOBAL**

It is a new system for quality main entrance doors. Distinguished for its modern design and its high performance, the system provides the ability to create entrance doors with panels or glazing infills. The special double-sided coplanar design provides unique entrance doors with an exceptional aesthetic value.

A new system for modern coplanar main entrance doors with high standards and emphasis on safety. The system offers the possibility of realizing cost efficient constructions, using either aluminium panels or glazing. The possibility of using an adhesive metal sheet over the entire outer sash with a coplanar design, provides not only outstanding minimal aesthetics, but also enhanced security.

MD7 6 is a new system for quality main entrance doors. Distinguished for its modern design and its high performance, the system provides the ability to create entrance doors with panels or glazing infills. The special double-sided coplanar design provides unique entrance doors with an exceptional aesthetic value.

- / Basic depth of system: 76 mm.
